

School Board

Board Member Development and Training

It is the policy of the Board of Education to maintain membership in the Illinois Association of School Boards, its tri-county division, and the National School Boards Association.

Board members are encouraged to participate in local, state and national meetings, which are designed to acquaint them with issues in public education, new or proposed legislation, policy development, school system administration, and efficient Board operation.

When an approved meeting is not attended by the full Board, those who do participate will be requested to share information, recommendations, and materials acquired at the meeting.

Funds for attending such meetings will be included in the annual budget, and Board members will be reimbursed for their travel expenses.

Also, Board members are encouraged to read current journals and other pertinent educational materials.
